

MSE Wall (Mechanically Stabilized Earth)

The Judy Company was mentioned recently by Lok Sharma, P.E. as being instrumental in the success of an MSE retaining wall. The design was performed by Terracon. The Judy Company installed stressing blocks and tie-backs, with the bonded lengths positioned in limestone bedrock.

According to Mr. Sharma "the team averted a major economic catastrophe for a Kansas City, MO property owner whose 35-foot MSE wall was moving and coming dangerously close to full collapse."
